EXPERIENCE

Software Development Engineer

Aug 2025 – Present

Amber

Pune

- Led full-stack migration of customer support AI from Zendesk to Zoho across web and WhatsApp, contributing to an increase in AI-handled conversations from 40%→78% (web) and 50%→75% (WhatsApp).
- Built full-stack whitelabel personalization features using React.js and REST APIs, including custom pages, forms, branding, and partner-specific inventory flows, contributing to 70% growth in platform leads.
- Reduced conversational AI response latency from 12s→7s by parallelizing workflow execution, optimizing search logic, and eliminating redundant processing.
- Integrated and optimized AI-powered lead qualification workflows using Blue Machines AI, improving call engagement by 2×.

Software Engineer Intern

July 2024 – June 2025

Cleartrip (Flipkart)

Bangalore

- Developed and optimized flight filters (One-way price, Trip duration, Layover duration) using Java, Spring Boot, and REST APIs, reducing search latency and enhancing Cleartrip for Work UX.
- Fixed a production pricing bug that led to Rs.40L revenue loss due to Rs.0 convenience fees, restoring billing accuracy by patching transactional flows.
- Led resolution of SEV-0 production outages during on-call; collaborated cross-functionally to mitigate impact quickly.

PROJECTS

Skill Quest *Java Spring Boot, FastAPI, REST APIs, ReactJS, GPT-4*

- Architected an AI-powered Resume Ranking System using GPT-4 for semantic skill matching, ATS scoring, and contextual resume analysis via a microservices architecture.
- Engineered a Spring Boot backend for multi-format file parsing, secure upload/download, report generation (OpenHTMLtoPDF), and REST API orchestration.
- Implemented a FastAPI ML microservice using GPT-4 with semantic parsing, LRU caching and async batch processing for high-performance resume evaluation.
- Developed a retro-themed, responsive ReactJS frontend with real-time file/link validation, dynamic resume cards, leaderboard visualization and downloadable ranking reports.

CodeWeave *React, Socket.io, Monaco Editor, Piston API, WebSockets*

- Developed a real-time collaborative code editor for live interviews, remote pair programming, and coding sessions.
- Integrated Monaco Editor for IDE-like functionality and Piston API for code compilation across multiple languages.
- Utilized Socket.io for real-time sync and session management between users.

EDUCATION

Chitkara University

Oct 2021 – July 2025

Bachelor of Engineering in Computer Science – 9.10 / 10

TECHNICAL SKILLS

Languages: Java, JavaScript, C, C++, SQL, Python (basic)

Frameworks: Spring Boot, ReactJS, NodeJS, ExpressJS

Tools: PostgreSQL, AWS, GCP, Kubernetes, SQS, Git, Github

Concepts: REST APIs, Microservices, CI/CD, Observability (Kibana)

Coursework: Data Structures & Algorithms, Operating Systems, DBMS, OOPs

CERTIFICATIONS

McKinsey.org Forward Program

Google Cloud Computing Foundations Pathway – Google

Career Essentials in Generative AI – Microsoft and LinkedIn

LEADERSHIP & CAMPUS ENGAGEMENT

Design Lead - GDSC: Led branding and graphic design for campus-wide tech events.

Event Coordinator – GDSC: Organized hackathons (OctaHacks) and workshops (Tenet).
