EDUCATION

Chitkara University

Oct 2021 – June 2025

Bachelor of Engineering in Computer Science – 9.24 / 10

Senior Secondary (XII) – 92.6%

2021

Secondary (X) – 94.2%

2019

EXPERIENCE

Software Engineer Intern

July 2024 – June 2025

Cleartrip (Flipkart)

Bangalore

- Developed and optimized flight filters (One-way price, Trip duration, Layover duration) using Java, Spring Boot, and REST APIs, reducing search latency and enhancing Cleartrip for Work UX.
- Fixed a production pricing bug that led to Rs.40L revenue loss due to Rs.0 convenience fees, restoring billing accuracy by patching transactional flows.
- Designed and implemented a DPDP-compliant user data export system using MySQL for persistence, secure access logic, Kafka-based event logging and dynamic notifications via a centralized communication service.
- Led resolution of SEV-0 production outages during on-call; collaborated cross-functionally to mitigate impact quickly.
- Designed and built custom Kibana dashboards and integrated Elasticsearch-based structured logging for real-time production observability.

Web Development Intern

Jan 2023 – Feb 2023

Teachnook

Remote

- Built responsive UI with HTML/CSS and developed interactive components using vanilla JavaScript.
- Handled DOM manipulation, input validation, and implemented modular design for reusability.

PROJECTS

Skill Quest *Java Spring Boot, FastAPI, REST APIs, ReactJS, Apache Tika, GPT-4*

- Architected an AI-powered Resume Ranking System using GPT-4 for semantic skill matching, ATS scoring, and contextual resume analysis via a microservices architecture.
- Engineered a Spring Boot backend for multi-format file parsing, secure upload/download, report generation (OpenHTMLtoPDF), and REST API orchestration.
- Implemented a FastAPI ML microservice using GPT-4 with semantic parsing, LRU caching and async batch processing for high-performance resume evaluation.
- Developed a retro-themed, responsive ReactJS frontend with real-time file/link validation, dynamic resume cards, leaderboard visualization and downloadable ranking reports.

CodeWeave *React, Socket.io, Monaco Editor, Chakra UI, Piston API, WebSockets*

- Developed a real-time collaborative code editor for live interviews, remote pair programming, and coding sessions.
- Integrated Monaco Editor for IDE-like functionality and Piston API for code compilation across multiple languages.
- Utilized Socket.io for real-time sync and session management between users.

Library Management Website *React, MySQL, NodeJS, Express, REST APIs*

- Developed and deployed CRUD APIs for user management, book lending, and returns. Integrated MySQL for persistent storage.
- Implemented routing and frontend logic using React with responsive UI components.

TECHNICAL SKILLS

Languages: Java, C, C++, SQL, JavaScript, Python (basic)

Frameworks: Spring Boot, ReactJS, NodeJS, ExpressJS, Socket.io

Tools: Git, GitHub, Postman, IntelliJ, VS Code, GCP, Kubernetes

Concepts: REST APIs, Microservices, CI/CD, Observability (Kibana)

Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOP

CERTIFICATIONS

Google Cloud Computing Foundations Pathway – Google

Career Essentials in Generative AI – Microsoft and LinkedIn

Crash Course on Python – Google

ACHIEVEMENTS

Completed Google Cloud Computing Foundations Pathway.

Selected for University Coding Academy among top 3% applicants.

Secured 1st place in intra-college Web-a-thon competition.

LEADERSHIP & CAMPUS ENGAGEMENT

Design Lead – GDSC: Led branding and graphic design for campus-wide tech events.

Event Coordinator – GDSC: Organized hackathons (OctaHacks) and workshops (Tenet).
